

Modul-Connect®

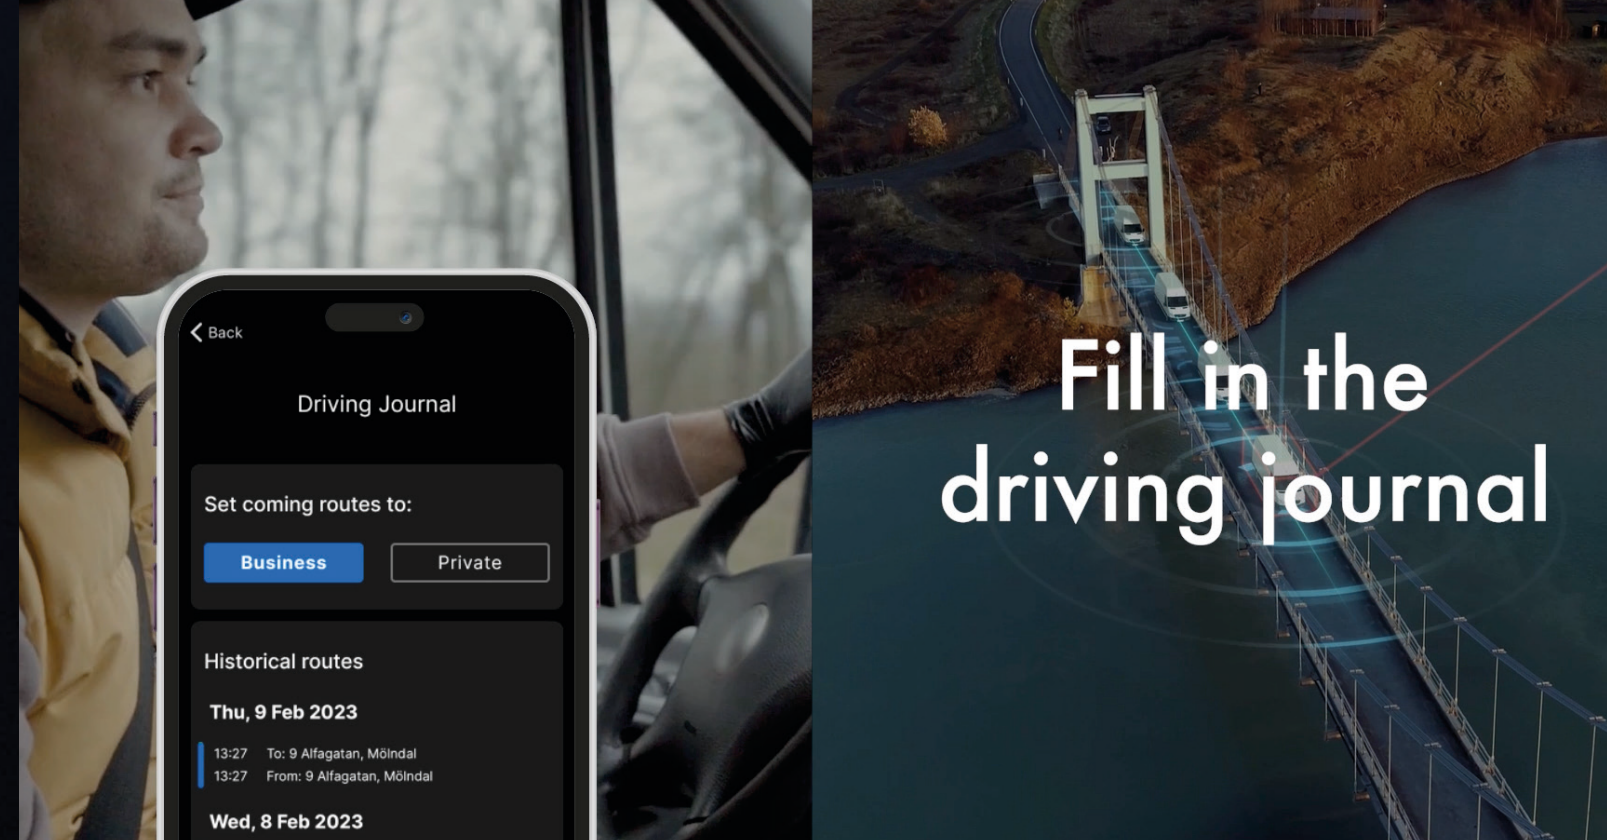

Ready to power your future

The hub serves as the central control unit for Modul-Connect, offering a wide range of functionalities, from basic light control to advanced security features.

With the ability to monitor and manage additional electronics, users can access both real-time and historical data through a single platform.

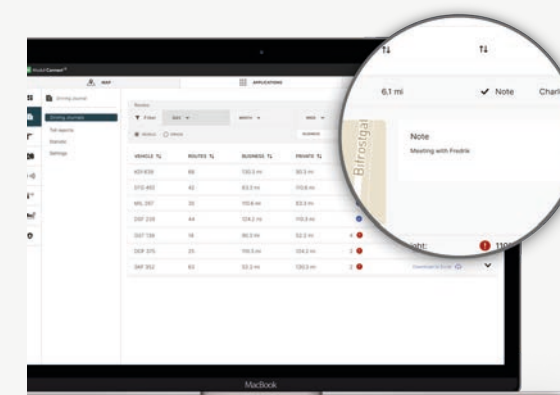

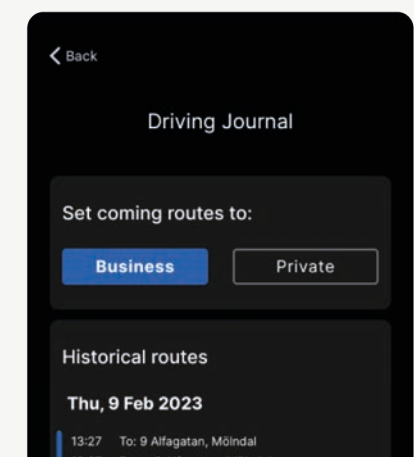

Fill in the driving journal

When you purchase a Hub, a Driving Journal is also included, making it easy to keep track of your mileage and workdays at no extra cost.

Business or Private?

Drivers can view their own routes in the phone app and categorise trips as private or business.

Detailed Trip Notes

Whether it's client visit details, project notes, or mileage specifics, our intuitive interface allows you to record pertinent information effortlessly.

Weighing System

Drive safer and more economical with a Weighing System from Modul-System.

Our digital weighing system helps you monitor the weight in real-time, ensuring that your vehicle is never overloaded.

Check the vehicle weight

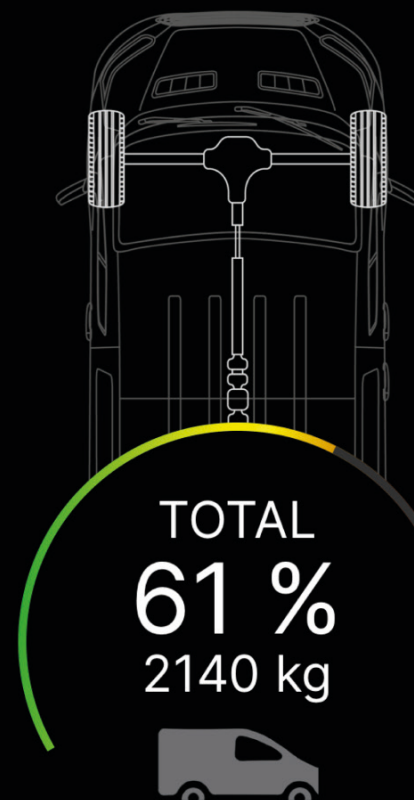

This system enhances safety, prolongs vehicle lifespan, and contributes to operational efficiency by optimising payload capacity and distribution.

Available in App Store and Google Play

Security System

Secure your fleet with our Security System. Use the Modul-Connect app to arm or disarm the alarm system effortlessly and receive instant notifications for any alarm triggers.

Available in App Store and Google Play

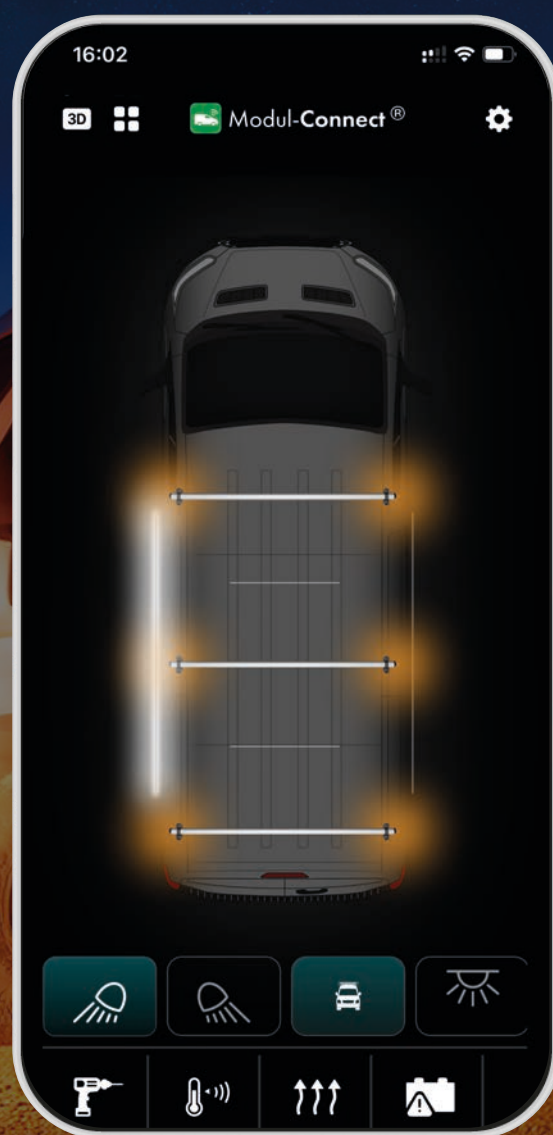

We understand the importance of protecting your equipment. That's why we've developed an alarm system that detects unauthorised movement in your vehicle when the alarm is activated and sends an instant notification to your phone. This gives you peace of mind, knowing that your vehicle and its contents are always under watch.

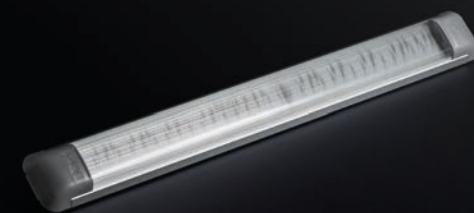

Lights

Whether you're working in dimly lit areas or need extra visibility during nighttime operations, our lights provide reliable performance to keep you working safely and efficiently.

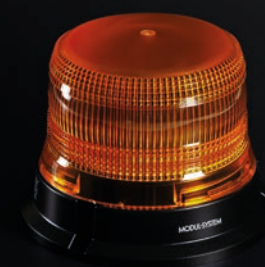

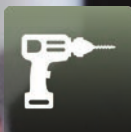

Available in App Store and Google Play

App-Controlled Work Lights

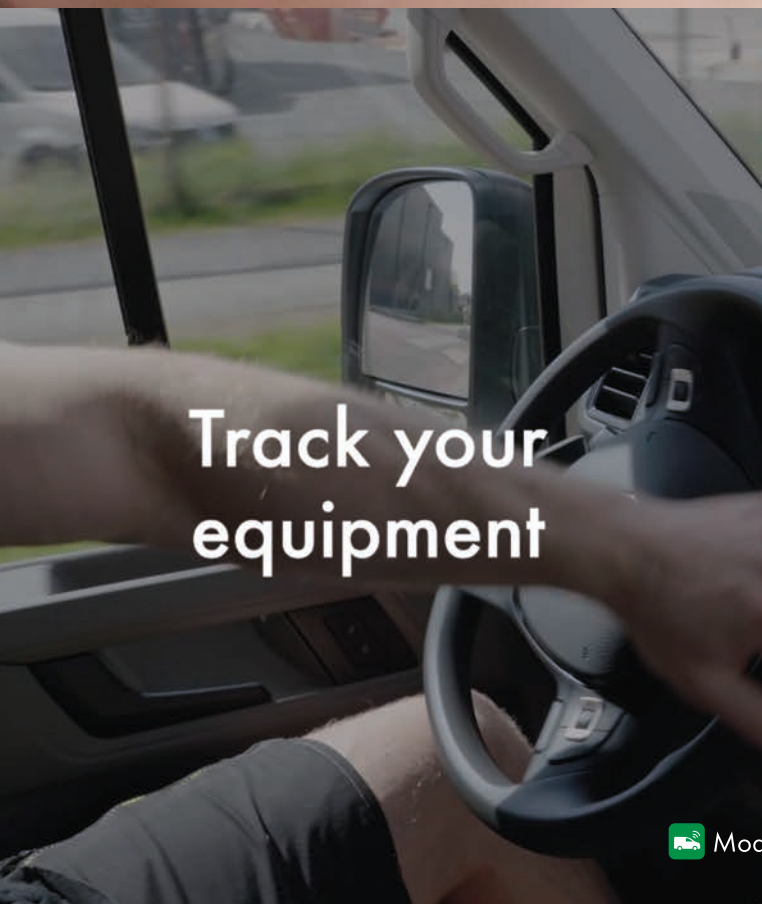

Control the work lights in your vehicle directly via our user-friendly app – Modul-Connect

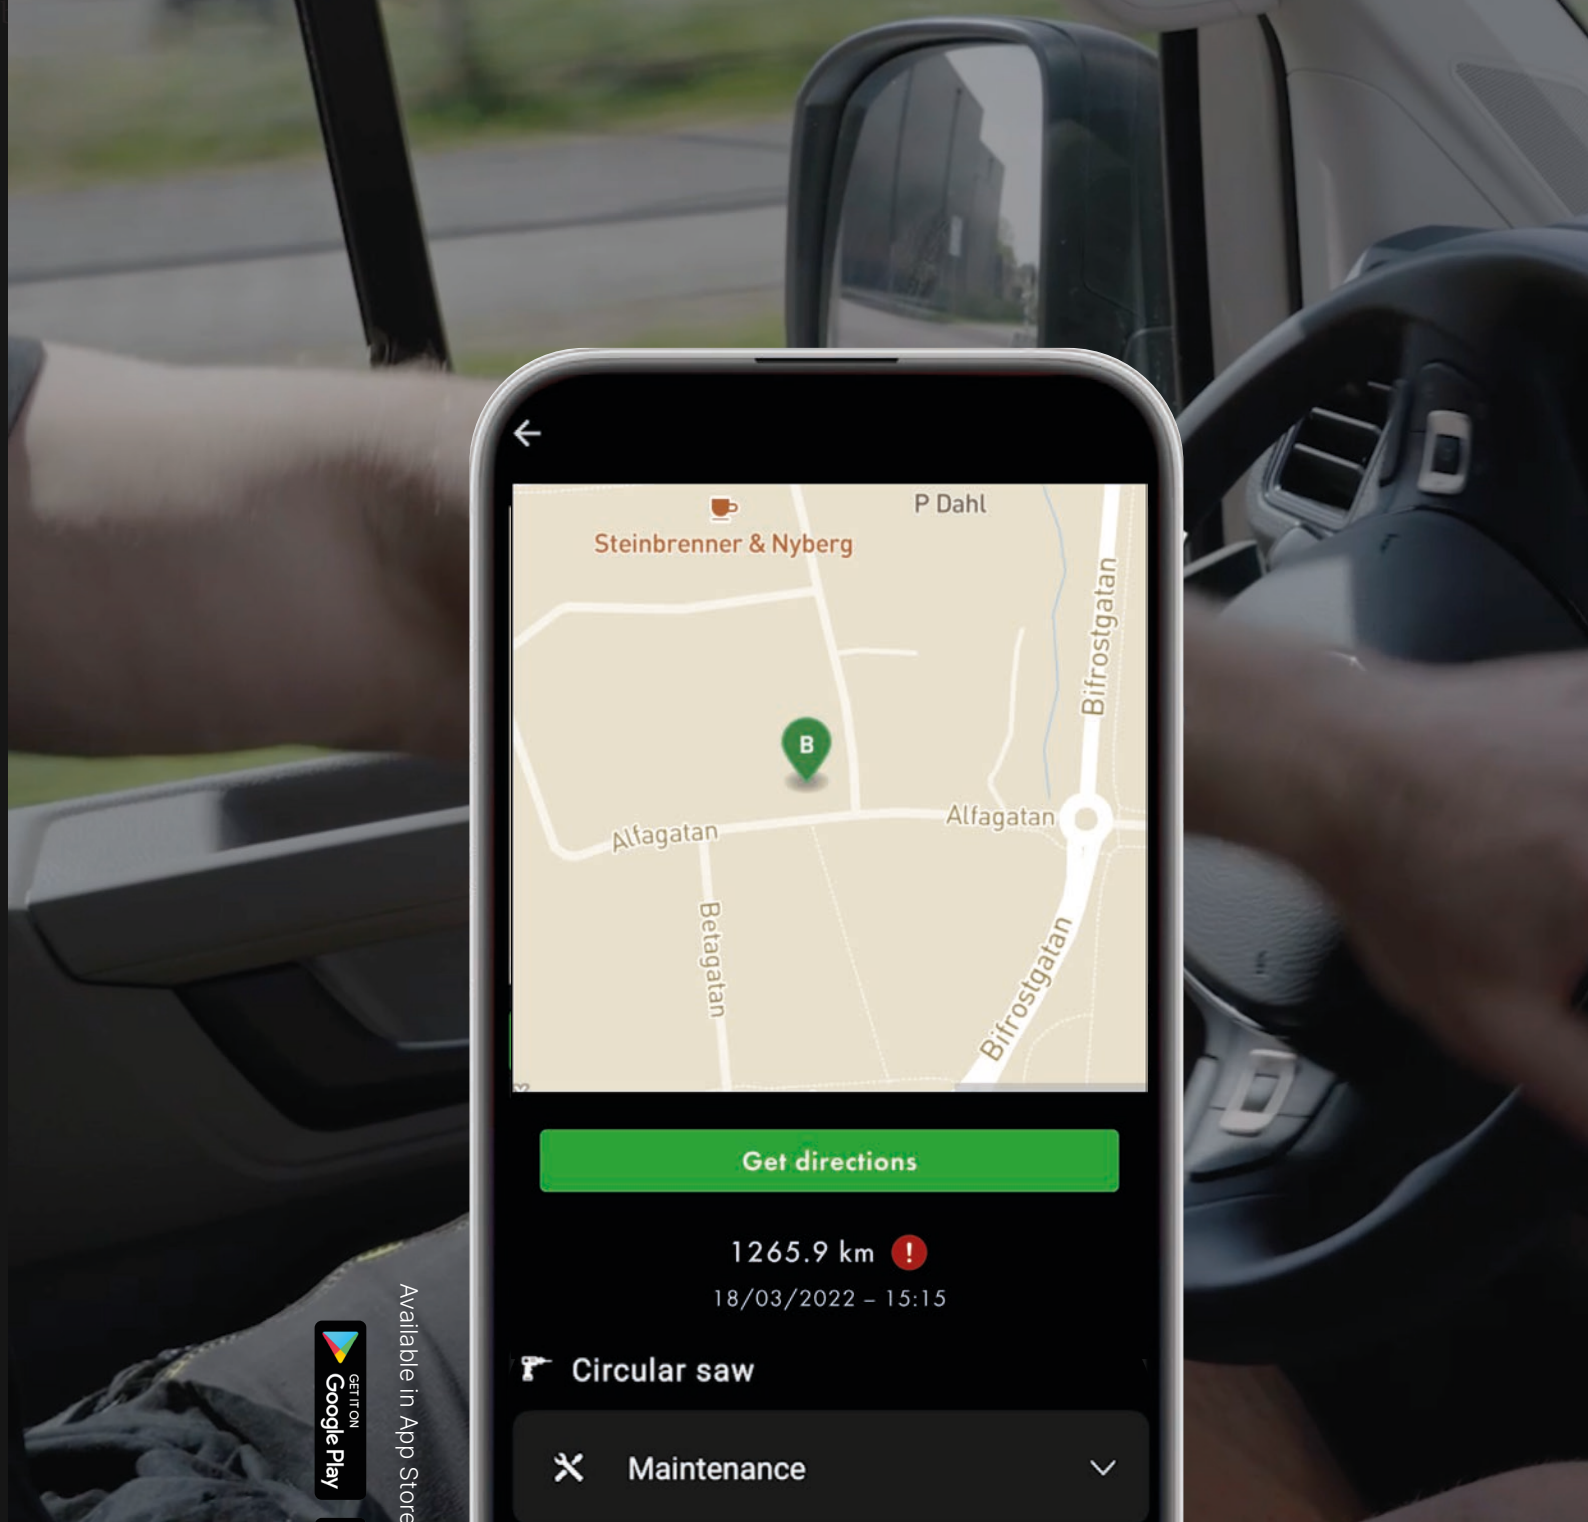

Tool Tracker

With our smart asset trackers, you can easily keep track of your fleets valuable assets via the Customer Portal and App.

Climate Control

Ensure safe transit for temperature-sensitive goods with real-time monitoring, instant alerts, and easy access to historical data.

Measure, monitor and historical save your vehicle's climate.

With Modul-System's climate sensor, you can monitor temperatures from -40°C to 85°C^* and are immediately notified when your set limits are exceeded. It helps you maintain the quality of your goods during shipping and the risk of goods loss is reduced.

* 60°C with batteries or 85°C wired to 12v.

Instant Overview

Gain a comprehensive view of your vehicle's climate conditions and receive immediate alerts if specified limits are exceeded, ensuring proactive management of temperature and humidity levels.

Climate Sensor

Sensors in Vehicle

Bulkhead	24°C 55%
Floor	6°C 38%
Door	12°C 40%

Power Supply

e-Power, the ultimate solution to keep your vehicle energised and ready for your daily tasks.

Available with an optional Xtreme feature, ensuring reliable performance even in extreme temperature ranges.

Navigation

Simple navigation in the menu with responsive buttons that are easy to use, even when wearing gloves.

Shortcuts

Easy access to activate your connected inverter or heater. You can even connect two of your chosen electrical devices to the shortcut buttons AUX1 and AUX2.

High quality screen

Dimmable screen with day and night mode.

Time remaining

Easily see how long you can run your equipment.

USB-A & USB-C

USB ports for charging smaller devices.

Charging

When the unit is charging, it will display where the electricity is coming from, whether it's via AC, DC or Solar.

With intuitive navigation, accessing essential functions is effortless thanks to responsive buttons designed for easy operation, even when wearing gloves.

Power Inverter

The Modul-System Inverters is your reliable solution for on-the-go AC power.

RCBO

Built-in Residual Current Circuit Breaker (RCBO) to protect you and the inverter in case of a short circuit.

Sockets

Easily accessible contact with IP 44 classification.

Electric Heaters

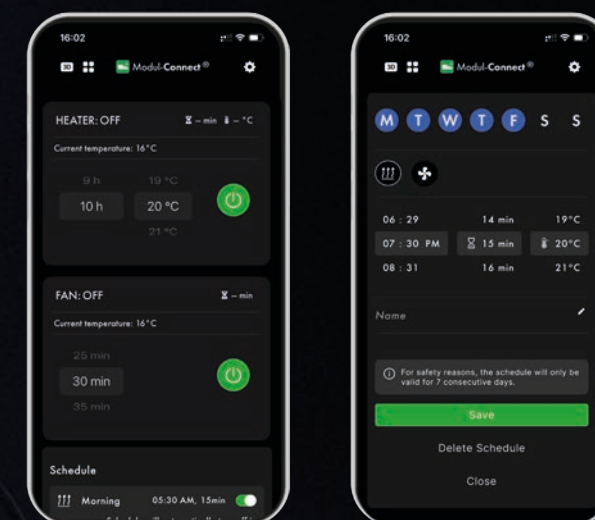

Say farewell to cold workdays and welcome efficient, personalised heating with the Modul-System e-Heater.

Our heating solution guarantees no particle emissions, setting it apart from conventional heaters. Enjoy a cleaner environment with eco-friendly technology.

Efficient Heating System

Its advanced integration with the Modul-Connect system allows for easy remote control, ensuring your vehicle is pre-heated and ready whenever you are.

Available in App Store and Google Play

Integration with e-Power

To operate the e-Heater, an extra battery is essential. By connecting it to Modul-System's e-Power—a dedicated auxiliary battery with control features—you gain both the additional power required and a control unit for scheduling and turning the heater on or off.
